

Media release: Infotech AG relies on a young management team

We are Infotech AG: We are always curious, interested in realizing new applications and always striving to exceed all expectations.

Management 1999 - 2024

For over 25 years, Infotech AG has benefited from the experience and passion of its founders, Managing Director Ernest Fischer and the management team with Dr. Urs Bürgi, François Seguin and Heinz Zimmermann (retired since 31.12.2023). Under her leadership, Infotech AG has established itself as a leading supplier of automation systems for a wide range of areas in the watch-, electronics-, semiconductor- and power electronics-industries.

Ernest Fischer
Director CEO

Dr. Urs Bürgi
HW R&D Manager

François Seguin
SW R&D Manager

Ernest Fischer will relinquish his position as Managing Director at the end of September 2024. His successor will be his long-time companion François Seguin. Dr. Urs Bürgi will also hand over his role as Hardware Development Manager to long-time employee Silas Kull at the end of September 2024.

These internal changes had been planned for some time. It was the wish of Ernest Fischer and Dr. Urs Bürgi to withdraw from the operational business in order to use their expertise more in the strategic area in the future and thus continue to support the young management team as management advisers with their experience.

Management starting October 2024

At the beginning of October 2024, longtime employees François Seguin CEO, Silas Kull CTO HW, Remo Bösiger COO and Jens Lochbaum CSO will take over the duties of the management team. With this internal solution, with the rejuvenation and expansion of the management team, the continuity of the operational business will be ensured and Infotech will continue to be run in a future-oriented manner:

François Seguin
Director
CEO

Silas Kull
HW R&D Manager
CTO HW

Remo Bösiger
Operations Manager
COO

Jens Lochbaum
Sales manager
CSO
